

Are my students learning what I think they're learning?

UW-Madison Teaching & Learning Symposium
Thursday, May 17, 2018

COLLABORATORS

Steven Cramer, Professor & Vice Provost for Teaching and Learning

Mo Bischof, Associate Vice Provost and Director of Assessment

Beth Martin and Mike Pitterle, School of Pharmacy

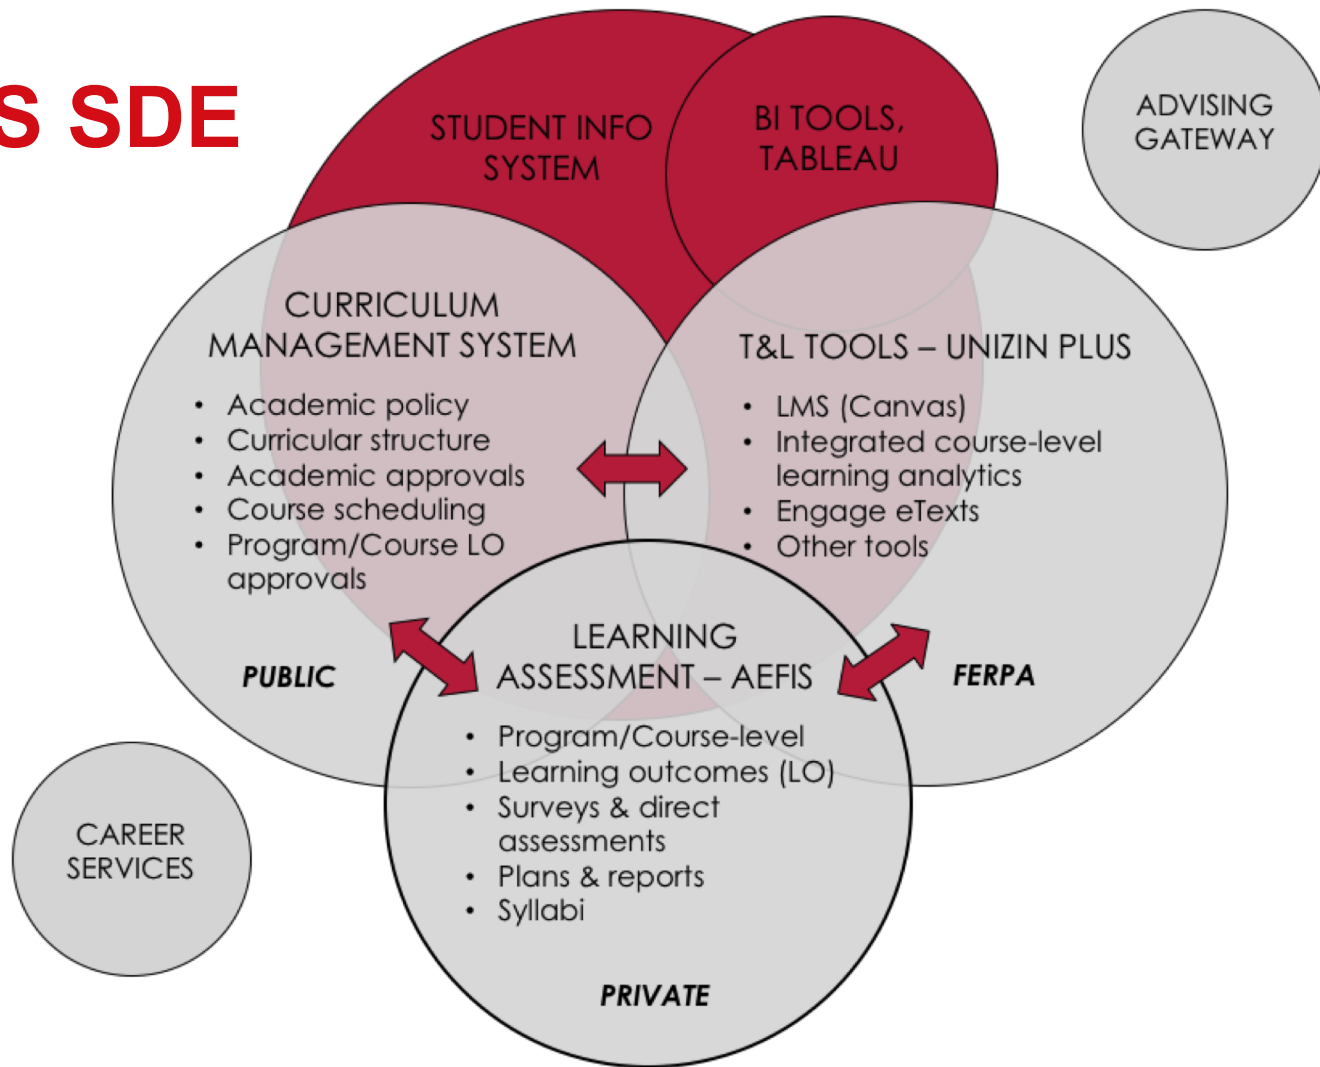

Laura Grossenbacher and Sara Hagen, College of Engineering

WELCOME & SESSION OVERVIEW

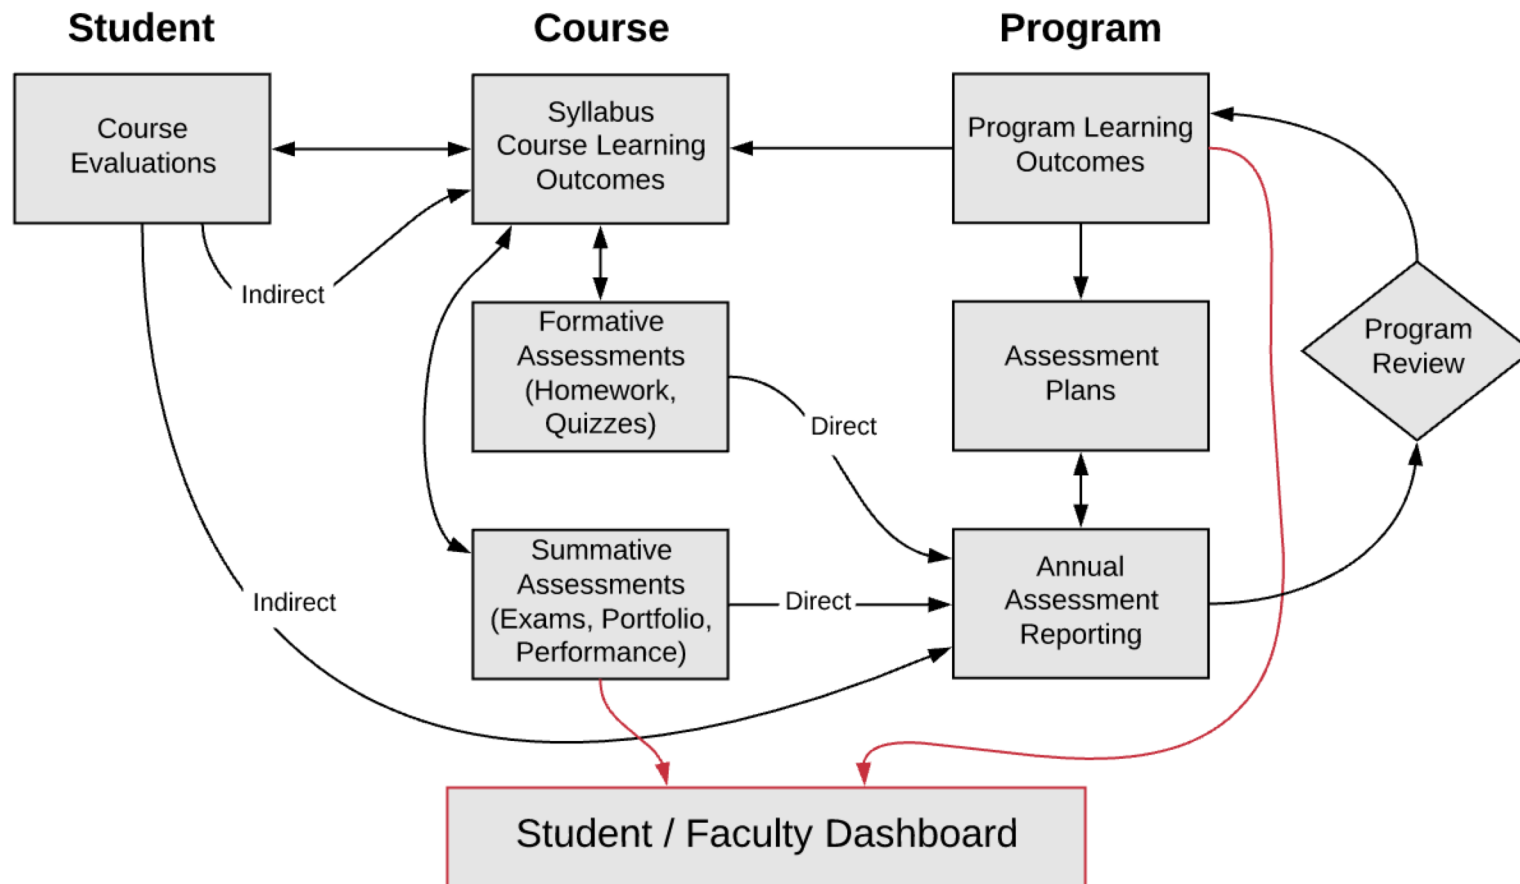

- Student Learning Assessment (SLA) Initiative
 - Integrating & Supporting Course & Program Assessment
- Direct Assessment Project
 - School of Pharmacy
 - College of Engineering
- Discussion & Q/A

CAMPUS SDE

SLA INITIATIVE

Integrating Assessment; Integrating Solutions

SLA INITIATIVE

Integrating Assessment; Integrating Solutions

Working toward full digital integration:

- Course evaluation surveys with instructor roles
- Course Learning Outcomes (CLOs) with student evaluations
- Curriculum maps and assessment planning with course and program learning outcomes
- **Direct assessment mapping to Program Learning Outcomes (PLOs) and CLOs with assessment reporting**

DIRECT ASSESSMENT

School of Pharmacy

- 15 educational outcomes for the Doctor of Pharmacy Program
- System of embedded assessments (“Outcome Tracker”)
 - Since 2013, all required courses have mapped major assessment activities to the EOs
 - Program reports have identified students who “need improvement” in achieving the outcomes.
 - Students have “Personal Outcome Tracker” results for continuing professional development reflections
- AEFIS/Canvas interface piloted with first-year field course

Public Health

Identify and address public health problems and promote health and wellness. Design individual and population-specific, evidence-based disease prevention and disease management programs (such as medication therapy management) and protocols based upon analysis of epidemiologic and pharmacoeconomic data, medication use criteria, medication use review, and risk reduction strategies.

LESSONS LEARNED

School of Pharmacy

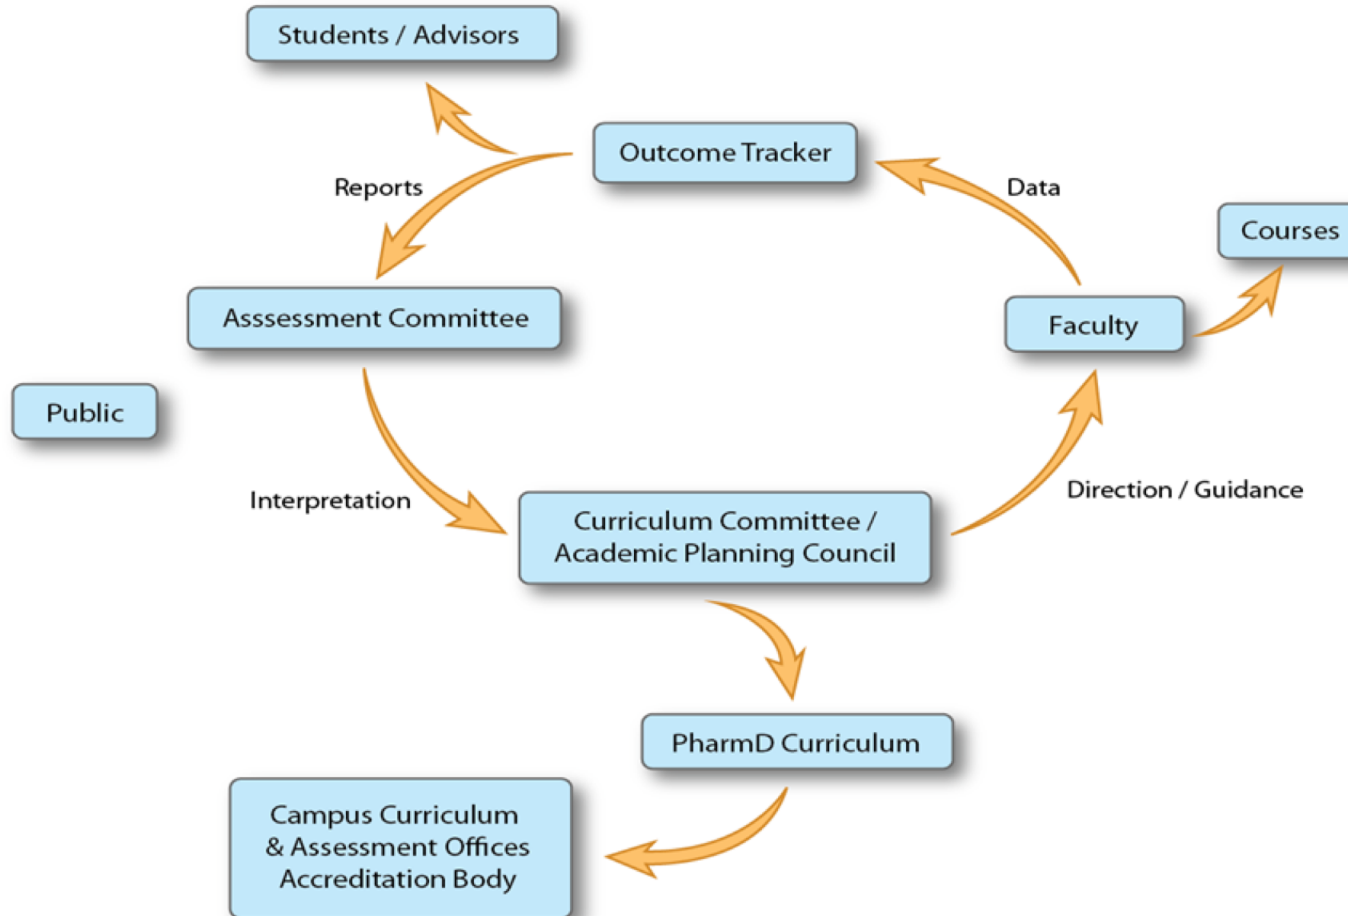

Good Things

- Not a shadow system - no need to export
- Allows for 3 student performance levels (does not meet, meets, exceeds)
- The initial set-up allows for single graded entry (no double grading for the direct assessment)
- Course level reports available

Future Directions

- All linked assessments must be in the Canvas gradebook - some importing may be necessary
- Reports needed for student (personal) and program level stakeholders
- Direct assessments copy from semester to semester - available shortly
- Consider identifying outcomes within a Canvas-administered quiz (e.g. not one outcome but several based on quiz items)

Outcome Tracker Stakeholder Flowchart

DIRECT ASSESSMENT

College of Engineering

Our 12 ABET-accredited engineering programs could benefit from an integrated system for capturing direct measures of ABET student outcomes

- Like the School of Pharmacy, our program's map required courses to outcomes
- We gather data in courses near graduation to determine areas needing improvement across the program's curriculum
- We piloted the AEFIS/Canvas integration in EPD 397, a junior-level technical communication course that assesses six ABET outcomes

DIRECT ASSESSMENT

College of Engineering

We use rubrics to grade, but we wanted an easy way to compile the data from multiple outcomes measured in each rubric.

Generates creative options for resolving the dilemma:	0	1-5	6-15	16-20	f
At least three creative options are discussed					
Details of the options consider the impact on all of the stakeholders					
Provides an ethical analysis of options, using codes and theory:	0	1-5	6-15	16-20	f
Each option is effectively considered using appropriate support (i.e. the NSPE code, the ethical decision-making process; moral theory/questions)					
Those support sources are referenced clearly and used appropriately (interpretations are sound)					
Chooses well-supported solution and effectively communicates it to stakeholders:	0	1	2-4	5	g
The solution chosen is effectively argued (using support listed above) as the most ethical solution; short and long-term impacts on stakeholders are carefully considered					

ABET
outcomes

Compiling
hundreds
of rubrics
and pulling
out this
data is
tedious. .

DIRECT ASSESSMENT

College of Engineering

With a rubric built into Canvas Speedgrader and key performance indicators linked to ABET student outcomes, the assessment work for faculty could be a snap.

Grade 87 out of 100

View Rubric

Ethics Team Presentations (Spring 2018)

Criteria	Assessment
Provides background and story of the case dilemma view longer description	Meets Expectations The background on the case was carefully detailed but seemed really choppy somehow -- seems like you needed to tell it more like a story; we needed to understand the context better...

3	3	2	3
3	3	3	3
3	3	3	3
3	3	2	3
3	3	3	3

Provides background and story of the ... Rubric: Exceeds Expectations Note: Great coverage of the background and the stakeholders in this case. Great to hear Josh P. bring up that the case is actually about a possible fraudulent activity. The company may have been deliberately defrauding the government (DoD).	Points: 20 of 20
Engages directly with the audience's ... Rubric: Meets Expectations Note: Some of your peers agreed with your decision on Option 3, but others felt like it wasn't nearly enough: you needed more analysis there or more careful thinking about long-term consequences if the truth comes out.	Points: 4 of 5
Chooses well-supported solution and ... Rubric: Note: The solution is troubling to me, because our main engineer in the case could be seen as colluding with fraud. If she chooses Option 3, how can she communicate about this situation so that she is not somehow seen as implicated?	Points: 2 of 5

Student names hidden -- data expressed as "3 - exceeds, 2 - meets, 1 - does not meet"
